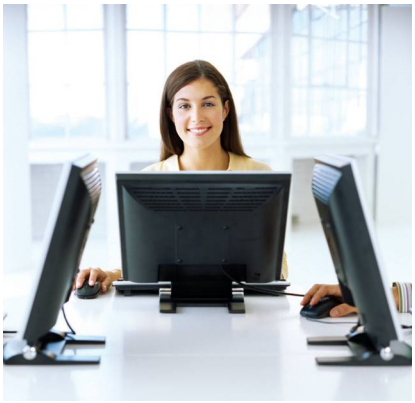
PAYROLL MODULE



The PrimeWorks® .NET Payroll module is part of the Financial Suite of BUSWORKS software systems. It is cloud hosted in a secure Sydney data centre, backed up nightly at a remote data centre & is used by Leading NSW Metro, Outer Metro and Regional Rural Bus Operators.

Using the latest technology, the system is a Modernized and updated version of the ***DATASPEED®*** DOS and Windows Payroll systems, the pioneering software system for the Australian Bus and Coach Industry. With over 30 years' knowledge and experience in supporting the Bus & Coach Industry in Australia, PrimeWorks® will "ensure continuity for your industry".

New Standard Features

Standard Features of the new system include:-

- One Employee record that may co-exist in multiple companies/payrolls
- Full Time, Casual and Permanent Part Time employee statuses
- Facility to check validity of Driver Authority Licenses
- Compliant with Click Super, Colonia l and Tasplan specifications
- Termination Pay & Back Pay calculations
- Driver integration with our Audit Compliance module
- Integrated with the Dataspeed Windows Shifts & Rosters (later with the Primeworks .Net Shifts and Rosters system
- Retain pay periods for at least seven years and ability to reprint payslips and reports for any single or range of previous pay periods
- Unlimited (user defined) employee qualifications
- Powerful auto generated payslips messages targeting any date driven fields
- 4 different ways to accrue RDO and independent Time In Lieu tracking
- Ability to set limits in gross or net pay for any deductions including salary sacrifice
- Email payslips and/or payment summary to employees
- Leave requests
- Powerful report builder to design user analysis reports
- Provide CSV file for General Ledger posting to other accounting packages
- Ability to rewind a wrongly executed reset without restoring data
- Unlimited number of bank accounts per employee

System Requirements

- OS: Microsoft Windows 7 with Firebox Version 16 or above)
- Broadband internet connection
- Microsoft SQL Server 2008 R2 Report Builder 3.0
