

VEHICLE MAINTENANCE MODULE

The PrimeWorks® .NET Vehicle Maintenance module is part of the BUSWORKS suite of operational software systems. It is cloud hosted in a secure Sydney data centre, backed up nightly at a remote data centre & is used by Leading NSW Metro, Outer Metro and Regional Rural Bus Operators.

Using the latest technology, the system is a modernized and updated version of the **DATASPEED®** DOS and Windows Bus Maintenance systems, the pioneering software system for the Australian Bus and Coach Industry. With over 30 years' knowledge and experience in supporting the Bus & Coach Industry in Australia, PrimeWorks® will "ensure continuity for your industry".

New Standard Features

Standard Features of the new system include:-

- Facility for staff to enter defects using a mobile device
- Seamless ability to transfer vehicles from one depot to another within one group
- Intergration to a third party management system (eg. Datafuel)
- Tyre Recording system
- Job Card system for services
- Ability for system administrator to roll back data entries (E.g. Fuel, Services, Month End Resets)

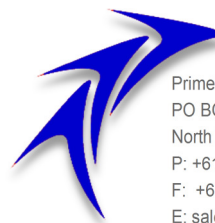

System Requirements

- OS: Microsoft Windows 7 with Internet Explorer 9

(Recommended browser is firebox Version 16 or above)

- Broadband internet connection
- Microsoft SQL Server 2008 R2 Report Builder 3.0
- Microsoft RSCClientPrint 2008 Internet Explorer add-on*

* Installs from within the report viewer screens within the application.
Some system requirements may require a user with administrative privileges to be installed.
