*'Innovative software that works'*

# PAYROLL MODULE

The PrimeWorks .NET Payroll module provides users with an easy to use and ATO compliant cloud hosted solution. Our module can be operated as a stand-alone Payroll system or fully integrated with our Shifts & Rosters module. We also offer the option to integrate with third party rostering and/or accounting software.

Payrolls can be operated on a weekly, fortnightly, half monthly & monthly. The Monthly subscription fee is scaled and geared around the number of Active Employees or Payment Summaries required each year for your group.

Our system also includes the following:

- **Emailing Payslips**
- **Permanent Part Time Employees**
- **Payment Summaries:** At financial year-end, ATO Compliant Payment Summaries can be printed or emailed to employees. Individual Payment Summaries can be printed at any time (e.g. employees leaving before years' end).
- **Back Pay:** System calculates the amount of back pay for a single or group of employees, cost centres or dates. It is particular useful for processing global pay rate changes/increases (that affect most or all of your employees) in the case where rate changes are backdated, saving a lot of manual work and transactions.
- **Termination Pay:** calculate and individually assign Earning Types and Addition/Deduction to create a complete termination payment
- **Extended Additions / Deductions:** Allows some greater flexibility when assigning additions and/or deductions to an employee
- **Automatic Leave Loading**
- **Employee Leave Request**
- **Super Disk Transfer:** Produces a transfer file containing superannuation contribution details to a Super Fund's specific formatting requirements.
